(1)

MEMORIAL FROM THE PUBLIC OF COONDAPOOR, SOUTH CANARA.

Sir,

We, the undersigned memorialists beg to submit as follows:-

(1) We understand that the Udipi Electric Supply Corporation, has been taken over by the Govt. of Madras, and an old engine with less capacity is being replaced by a new Engine with greater capacity. We further learn that there is a move by the Govt. to open a Thermal Station at Puttur or Moodbidri of this District with the assistance of the replaced Engine at Udipi.

(2) The public of Coondapoor have been agitating for the supply of Electric Power to this town since a pretty long time. It is needless for us to say that there is greater demand and utility for electric energy in Coondapoor than in any other place of this District.

(3) Coondapoor is one of the important towns of this District, and is served with a Major Panchayat Board. It has a population of over 15000 and two well established tile factories, viz., The Mangalore Tiles Ld., and Prabhakara Tile Works. There is another industrial concern viz.,Plywood and Match Factory Ld. situated within the Panchayat Board area. Apart from these, Coondapoor is the Head Quarters of the Revenue Division consisting of Coondapoor, Udipi and Karkal Taluks. Within the Panchayat Board area, there are located several Government Offices viz., District Munsiff's Court, Forest Range Office, Post Office, The Taluk Office The R.D.O's Office, Registration Office, Magistrate's Court, Office of the Dy.Inspector of Schools,Hospital with in-patients wards etc.,There are two High Schools 2 Higher Elementary Schools and several elementary schools within the Panchayat Board area. Two Cinema Houses are under construction and will be completed very soon. Besides these, there are branches of several important Banks of our District numbering about 10, and four printing Presses. All these institutions and also more than 500 Houses will be served by a Thermal Station if it is established in the town. Apart from this, the current may be utilised for street lighting by the Panchayat Board also.

(4) Under these circumstances, we the memorialists submit that the Government may be gratiously pleased to establish a Thermal Station within the Panchayat Board at Coondapoor with the replaced Electric Power Engine at Udipi. Thanking you,

We, the memorialists beg to remain,

PUBLIC WORKS DEPARTMENT

To
The Minister in charge of Public Works and Electricity.
to the Government of Madras.

Subject :- Installation of a Thermal Station at Coondapoor for supply of electricity.

Sir,

I have been directed by our Association to make the following representation regarding the instalation of a thermal station for supply of electricity ~~at~~ in Coondapoor Town. The resoluti on of our Association is as under :-

"This Association is of opinion that the Government of Madras should move in the direction of providing electricity for Coondapoor Town by installing a thermal station here or in the alternative by installing the old machinery at Udipi, until the benefits of the Jog Hydro-electric scheme is made available to our Taluk. The Secretary is hereby authorised to communicate the text of this resolution to the concerned authorities and the local M.L.As for necessary action "

In our District there are already thermal stations for generating electricity in Mangalore, Udipi and Karkala. We learn that the Government has decided to instal a new machinery at Udipi, and under these circumstances, the present machinery at Udipi can be with advantage used for building a thermal station in Coondapoor as a temporaty measure until electricity can be got from the Hydro-Electric Scheme at Jog in Mysore State.

There are already two tile factories and other industrial concerns who will be prepared to purchase electricity for industrial purposes. I can assure that this prpposition will be financially successful and Coondapoor and Gangolly, with a River in between, will be able to purchase the elctric load that may be generated from and out of that machinery. We hope

5275

and believe that this matter will receive the earnest attention of the Government of Madras.

Yours faithfully.

Secretary Bar-Association.

21597
20 MAR 1952
21597
PUBLIC WORKS DEPARTMENT

Sir,

Sub: Electricity - establishment of a Thermal Station at Coondapoor Panchayat area - requested.

Ref: Panchayat Board Resolution No. 257 dated 12-3-52.

I beg to submit that the public of this place have come to know that the Udipi Electric Supply Corporation has since been taken over by the Government of Madras and an old Engine with less capacity is being replaced by the Government ~~by the of Madras and an old Engine with less capacity is being replaced by the Government~~ of Madras by a new Engine with greater capacity. It is understood that there is a move now by the Government of Madras to open a Thermal Station in this District with the assistance of the replaced Engine at Udipi.

2. The public of Coondapoor have been agitating for the supply of Electric Power to this town since a very long time, as there is greater demand and utility for electric engery in Coondapoor than in any other place of this District where there is no supply of Electric Energy now. On hearing that there is a move by the Government to open a Thermal Station in this District with the assistance of the replaced engine at Udipi, the public have appfoached the Board to move the Government urgently in the matter of establishment of a Thermal Station within this Panchayat area at Coondapoor with the replaced Electric power Engine at Udipi in preference to other towns in the District for the following reasons.

3. Coondapoor is one of the important (taluk head quafter) town of this District. Coondapoor Town is within the Coondapoor (Major) Panchayat Board. Coondapoor Panchayat area comprises of two villages, Viz. Coondapoor Kasba and Voderhobli Villages with a square area of 3 miles. The Population of the Panchayat area is estimated to be about 16,500 and there are about 2500 dwelling houses and 550 shop buildings within the Panchayat area. The Board maintains about 5½ miles of road. With the best of our endeavours the lighting along the town roads is very inadequate though the Board lights 76 kerosene lights and 8 petromax lights for the street lighting spending about Rs. 2300. It is therefore very desirable to electrify the town to provide better amenity to the public. There are at present within the Panchayat area two tile factories two rice mills, one oil mills, one plywood match factory and three floor grinders ~~within the Panchayat area~~) In addition to this there are 5 Electric current generating sets and 5 pumpsets used for agricultural purpose. Thus about machines aggregating to 200 horse power are working daily in the town for the above purpose.

4. Coondapoor is the headquarters of the Revenue Division consisting of Coondapoor, Udipi and Karkal taluks. Within the Panchayat Board area there are located several Government Offices Viz. District Munsif Court, Forest Range Office, Post Office, Taluk Office, Revenue Divisionl Office, Registration Office, Central Excise Office, Government Hospital with in-patient wards Banks etc;. Besides there are High Schools, two higher ele. Schools, and several Ele. Schools. There is at present one touring cenima and two permanent theatres, under construction are nearing completion. Four printing Preses are working in this area. In the suburbs and neighbourhood of the town there there are agricultural lands which could be improved. Best varieties of timber is available at a short distance from the

~~Panchayat area for electrical~~

town and there is scope to have more timber yards within the Panchayat area if electrical energy is made available. If a Thermal Station is established at this place the industrial potentalities of the town could be tapped fully. Besides improving the neighbouring agricultural lands, more lands can be brought under cultivation by making the electrical energy available to the agriculturists. Under the circumstances the Board considers that this place has a preferential claim for establish a Thermal Station within the Coondapoor Panchayat Board with the replaced Electric Power Engine at Udipi and thus provide modern and essential amenity supply of Electrical Energy and Electrical lighting to this place.

A copy of Panchayat Board Resolution No. 257 dated 12-3-52 is enclosed.

Memo No. 19761 I/52-1 dated 24-3-52 to the C.E.(E)
From the C.E.(E), No. 173-I/50-55 dated 1-5-52.

The public of Coondapoor, the Bar Association and the Panchayat Board of Coondapoor, have requested that in view of the urgent need for extending electric supply to Coondapoor, a thermal station may be established at the place with the old replaced engine sets at Udipi. The C.E.(E) has stated that the place will get hydro Electric supply by the middle of 1954 and in the meanwhile it does not appear worthwhile to start a Thermal Station there and that the existing old engine sets at Udipi will be required to be kept at Udipi and Karkala. It may be mentioned that the agreement with Mysore for supply of Jog Power to South Kanara district has not yet been concluded. However, the petitioners may be informed on the lines of the C.E.(E)'s report at p. 27 c.f. A draft letter is accordingly submitted for approval.

2. The file may be circulated to M (P.W.) and M (H) for information with reference to the minutes of M.(H) at 'K' on p. 17 c.f.

19761 8/52

.M.(H) will probably remember that the only outstanding point for settlement in regard to the agreement with Mysore is that relating to the question of levy of a surcharge by Mysore on supplies made. Mr. K.T. Bhashyam, previous Electricity Minister of Mysore, had agreed that our draft was acceptable, but no formal reply had been received from Mysore. The C.M. addressed the Mysore C.M. demi-officially recently, and the Mysore C.M. promised to expedite matters. A revised draft agreement has just been received from Mysore [redacted], and this will be scrutinised. It should not be difficult to conclude the agreement in a few weeks and it should be quite possible to supply South Kanara by the middle of 1954, assuming that no drastic cut is made in the provision available for Electricity Extension Schemes.
